## Professional Summary

---

Detail-oriented Software Development Intern with 2 years of hands-on experience in building responsive user interfaces and troubleshooting complex software issues. Skilled in collaborating with cross-functional teams to enhance system performance and streamline development workflows. Strong communicator with a background in Biochemistry, bringing analytical thinking and problem-solving precision to technical challenges. Eager to contribute to innovative projects in a remote software engineering role.

Authorized to work in the US for any employer

## Work Experience

---

### Full Stack Developer

iZone5 NIG LTD-Port Harcourt, Rivers State

October 2023 to December 2024

- Collaborated with cross-functional teams to gather requirements and design software solutions that reduced project delivery time by 20% through improved planning and scope clarity
- Debugged and resolved complex software issues, leading to a 30% decrease in recurring support tickets and improving system stability
- Designed and implemented responsive user interfaces that increased user engagement by 25% and reduced bounce rates on key product pages
- Worked closely with QA engineers during testing phases to identify bugs or defects in the software system
- Collaborated with UI/UX designers on creating visually appealing user interfaces
- Contributed ideas for continuous improvement of development processes or tools used by the team

### Career Break

iZone5-Port Harcourt, Rivers State

August 2024 to October 2024

Focused on self-directed learning and building personal projects to sharpen my web development skills. Completed certifications in React and TypeScript, contributed to open-source projects, and enhanced my understanding of modern frontend best practices.

### Front End Developer

Ogtech Networks LTD-Awka, Anambra State

February 2022 to January 2023

- Implemented best coding practices and reduced page load times, resulting in a 15% decrease in bounce rates and a 10% boost in user engagement.
- Integrated RESTful APIs to fetch data from server-side databases and display it on the client-side
- Created modular components and libraries, enhancing development efficiency and reducing code duplication, leading to a 25% decrease in development time.
- Performed thorough testing of websites and applications to ensure functionality, usability, and adherence to accessibility standards, resulting in a 30% reduction in post-deployment bugs

- Used version control systems (e.g., Git) for code collaboration, tracking changes, and managing project versions effectively
- Implemented responsive web design techniques, resulting in a 20% growth in mobile traffic conversion rates.

### **Microsoft Office Specialist**

Ben Computers, Inc.-Awka, Anambra

August 2018 to March 2019

- Crafted and presented engaging PowerPoint presentations incorporating multimedia elements and animations, leading to a 15% rise in customer satisfaction scores.
- Executed Microsoft Word's mail merge feature to efficiently generate personalized correspondence for large-scale marketing campaigns, resulting in improved outreach effectiveness.
- Structured professional-grade manuals and policy documents using complex style sets, section breaks, and table of contents features, enhancing readability and navigation for end-users.

### **Career Break**

Ben Computers, Inc.-Awka, Anambra

November 2018 to January 2019

Took time off to support family responsibilities and manage important personal matters. Used this period to develop strong organizational and time-management skills while balancing multiple priorities.
